

CELL

- scenario
- framework
- model config

EXAMPLE

scenario: recipes
framework: Python/Flask
model config: claude-opus-4-8, T=0.2

1 or more samples

SAMPLE

one independent code-generation draw, e.g. sample0/

1 or more experiments (runs)

EXPERIMENT

- iterations N
- baseline attempts (code / spec)
- LLM budget
- k8s cluster profile
- load profile

EXAMPLE

iterations N: 10
attempts code: 5
attempts spec: 5
LLM budget: \$10
cluster: emulab

N iterations, one pass of the loop below each

ITERATION

one refinement pass
